

7.CONCLUSION

Under the conditions of the ISO 24444: 2019 standard, the *in vivo* SPF of the product MOLECULOGY STARTER SUNSCREEN SPF50+ PA++++ on 10 subjects was determined as **58.9**.

8.ARCHIVING

The study centre retains the study documents (final report, case report form, raw data) in its own archive rooms for a minimum of one year after the year they are archived. The study files for previous years are transferred for archiving to an external specialist company.

The storage period of the study files is 10 years for studies on cosmetic products. Beyond this time, the data are destroyed in the absence of an explicit request from the sponsor informing us to return them.
